

Lab Technician – Quality Control & Product Safety

Who are we?

A privately-owned sporting goods manufacturer that has been in business for over twenty-five years. We have received numerous industry awards for our business practices and excellent customer service. Our business philosophy is focused on our customers and we take pride in providing them with the best values in team sports equipment and apparel.

What are we looking for?

A Quality Control & Product Safety Technician to inspect hard goods and perform testing on protective equipment for product development and quality control purposes.

What would you do?

- Perform quality control inspections and testing on incoming hard goods per qualitative and quantitative criteria
- Document inspection and test results and follow through to resolve problems
- Develop and organize documentation for test protocols for reference
- Prepare samples for testing and storage
- Maintain test equipment and troubleshoot irregularities
- Work with Product Managers on prototype evaluation

What do you need?

- Attention to detail
- Ability to read and understand technical documents relating to equipment operation and specifications
- Ability to follow and develop test procedures
- Mathematical aptitude and willingness to learn about statistics as it applies to product testing
- Proficiency in Microsoft Word & Excel
- Good troubleshooting and problem-solving skills
- Strong written and oral communication
- Time management, organization, and multi-tasking skills
- Ability to stand for extended periods of time, kneel, bend, lift, and move items that weigh up to 50 lbs

Working hours will be somewhat flexible between 7 a.m. and 6:30 p.m., strong candidates will be able to work overtime on occasion as needed.

Must be willing to travel occasionally for in-service training (approximately 3 days/year).
